## Welcome Opening

Anna Johnson – Shaw AREVA MOX Services

Dr. Marc Miller – SRS Community Reuse Organization Chair

Mayor Deke Copenhaver - Augusta, Georgia

## Nuclear Technology: Opportunities in Energy & Beyond

Laura Clise, AREVA

Director, External Communications & Corporate Citizenship

Innovation in nuclear technology will continue to make a difference in our everyday lives. Opportunities to leverage nuclear technology in support of economic prosperity, health, and security span a variety of industries. Explore the possibilities of your nuclear future

## Driving STEM Success

Simona De Silvestro

Driver of the No. 78 Nuclear Clean Air Energy IndyCar

IndyCar racing and nuclear energy have more in common than you might think. Simona De Silvestro, #78 Nuclear Clean Air Energy IndyCar driver, will discuss the importance of Science, Technology, Engineering and Math (STEM) education, linking STEM education to the technology behind racing and clean energy.
